### Create or Verify ABHA Number

**You are creating or verifying an ABHA for a new patient.**

#### Manage Your ABHA

Choose an option below depending on whether you want to create a new ABHA, verify an existing one, or continue with quick registration.

**Quick Registration**  
Register a new patient quickly without ABHA.  
[Open Registration](#)

**Don't have an ABHA Number?**  
You can easily create your ABHA using your Aadhaar card.  
[Create using Aadhaar](#)

**Already have an ABHA Number?**  
Verify your existing ABHA to proceed with services.  
[Verify ABHA](#)

**Scan & Share Queue**  
Add patients to queue by scanning and sharing details.

# Bridging the Grassroots Gap in the Ayushman Bharat Digital Mission

Mann PHC: Accelerating ABDM adoption through clinical workflows built by doctors, for doctors

## The Reality

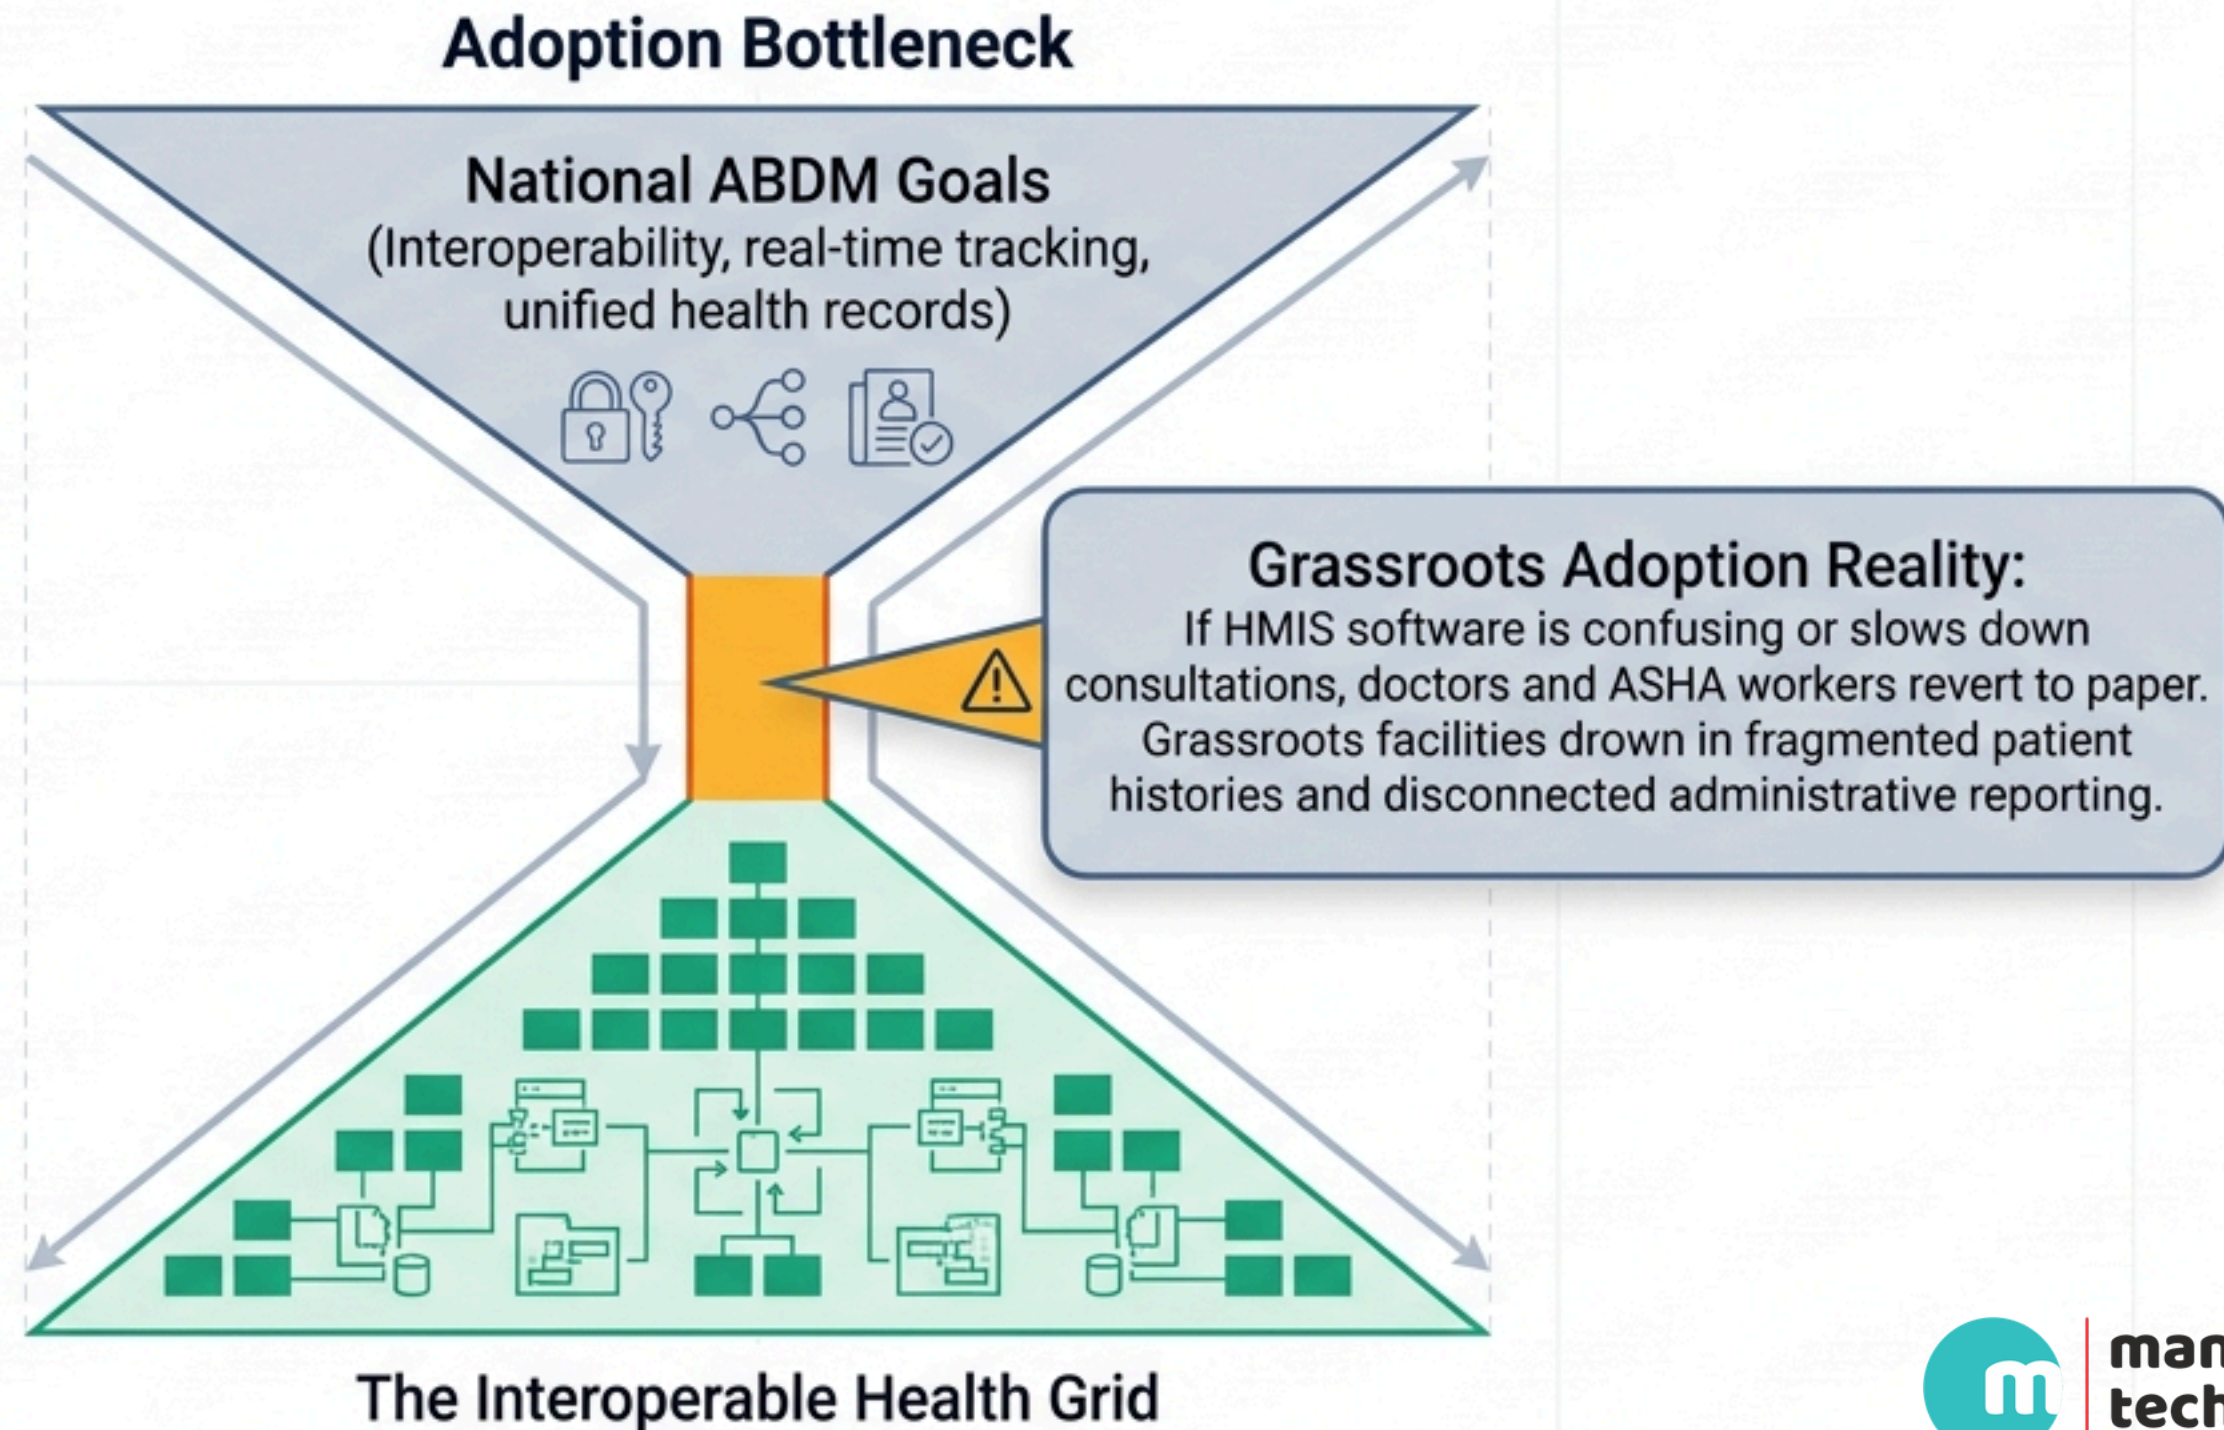

## The Vision

Every day in the clinic, I see the gap between national healthcare ambitions and grassroots execution. The Ayushman Bharat Digital Mission represents a brilliant future—but to achieve it, our Primary Health Centers need tools built for their daily chaos, not just administrative reporting. We built Mann PHC to bridge that exact gap.

Dr. Bhavin, MD Homoeopath  
Psychiatrist & Architect of Mann HMIS

# The Digital Mission Relies Entirely on Frontline Adoption.

# An Engine for Clinical Workflow, Not Slower Typing.

## Clinical Focus (The Doctor)

- Reclaims time to focus on saving lives.
- Dynamically supports multiple consultation mediums natively: Clinic, Call, Video, and Chat.

## Seamless Sync (The Staff)

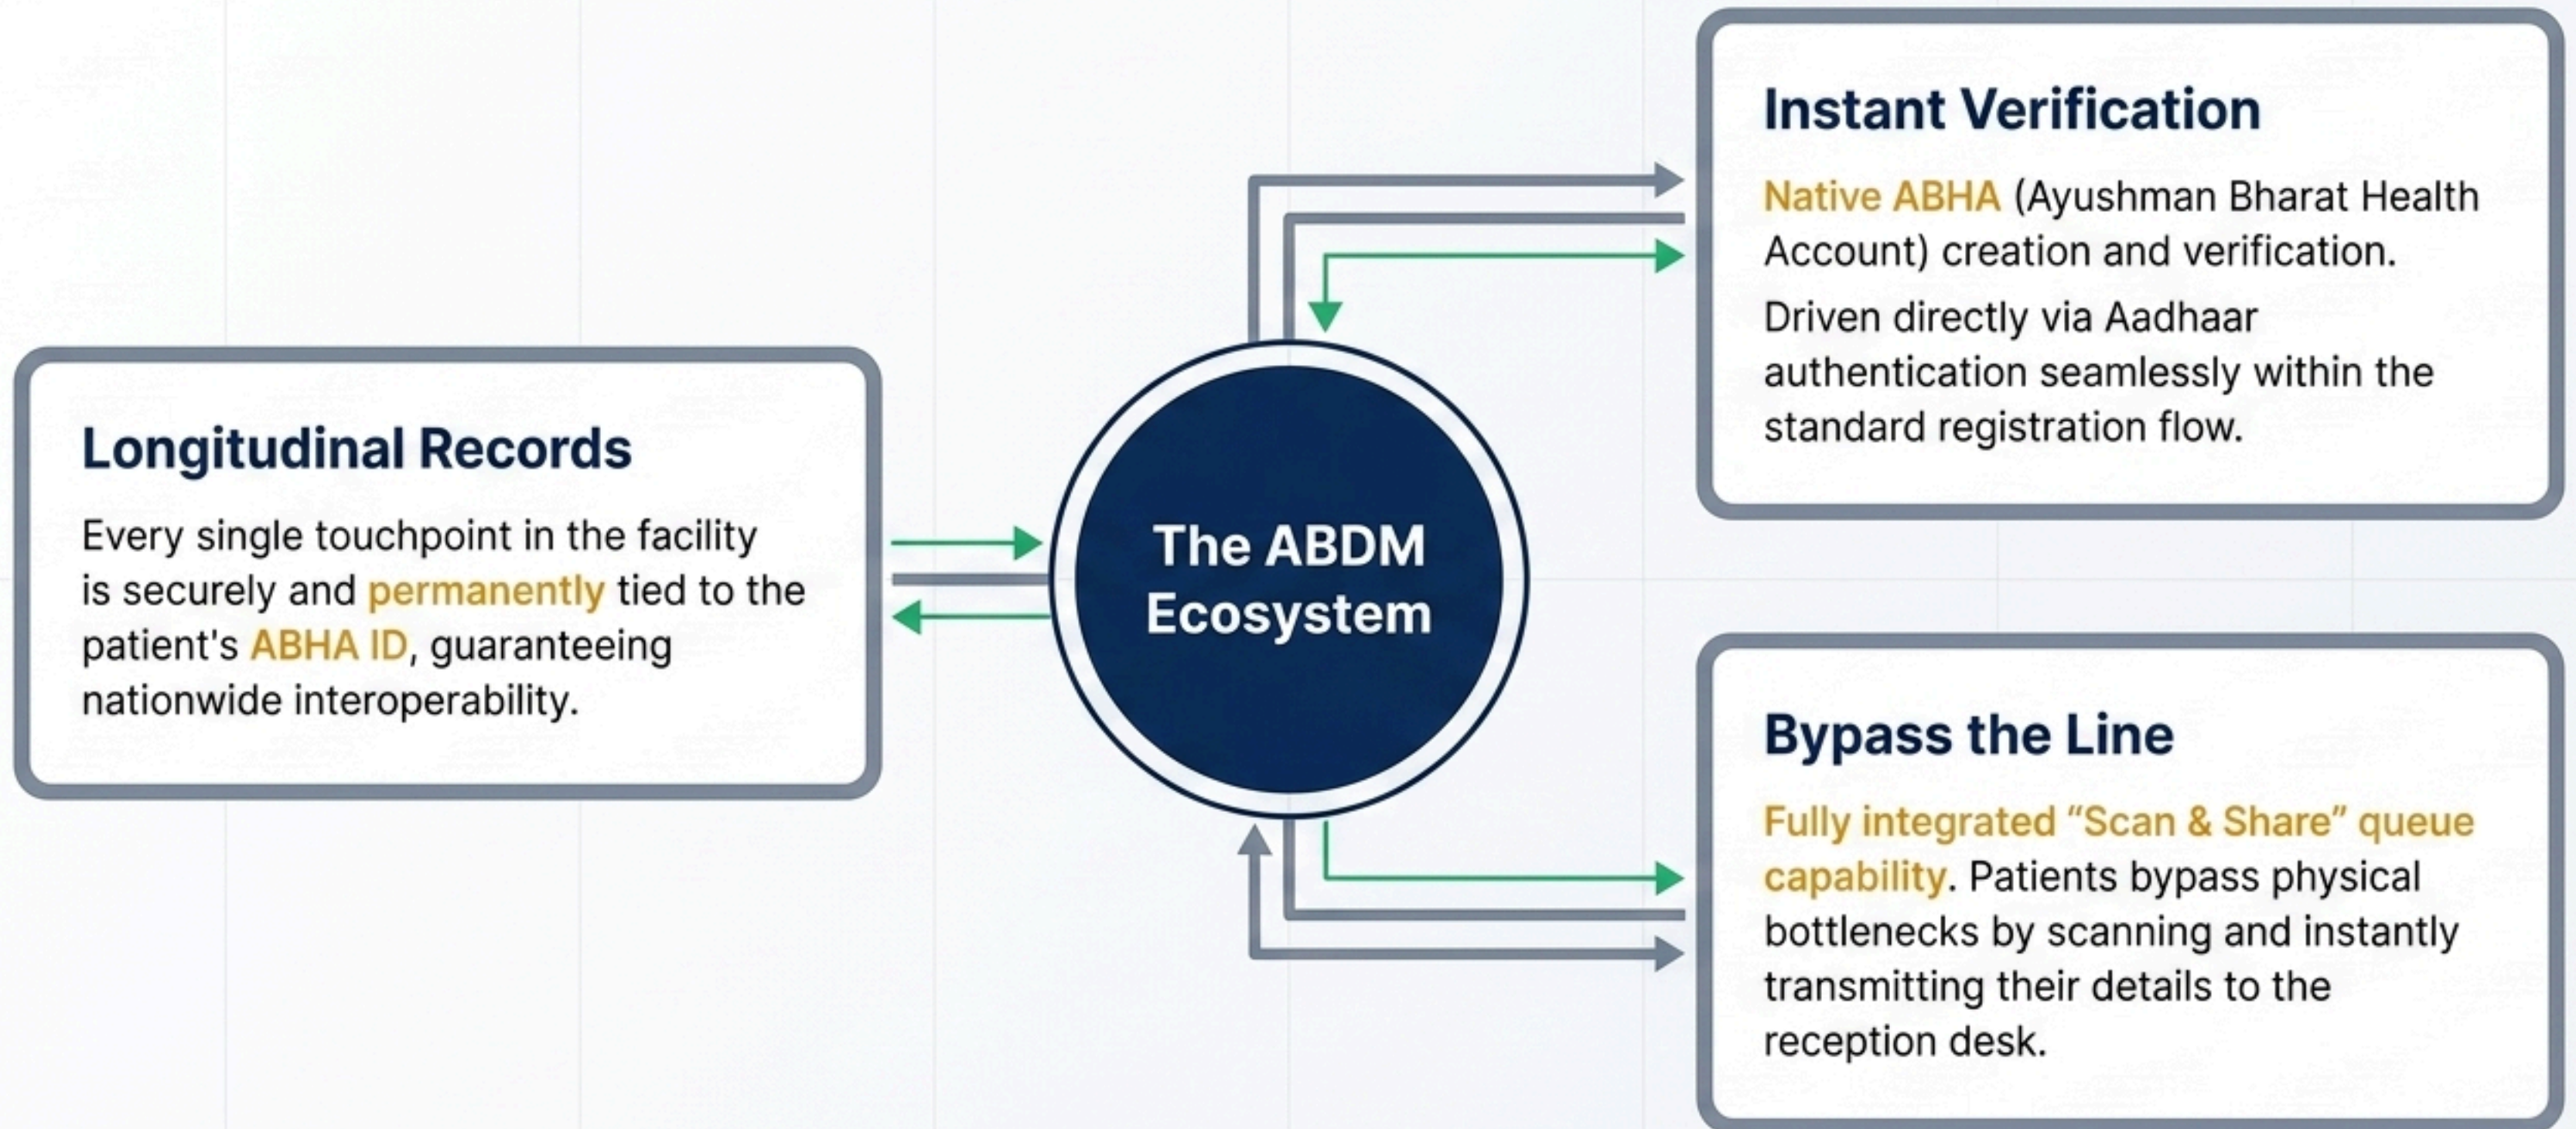

- Intuitive, built-in Kanban-style Planner.
- Effortlessly tracks daily tasks, urgent medical buckets, and internal facility development.
- Designed to organize without overwhelming.

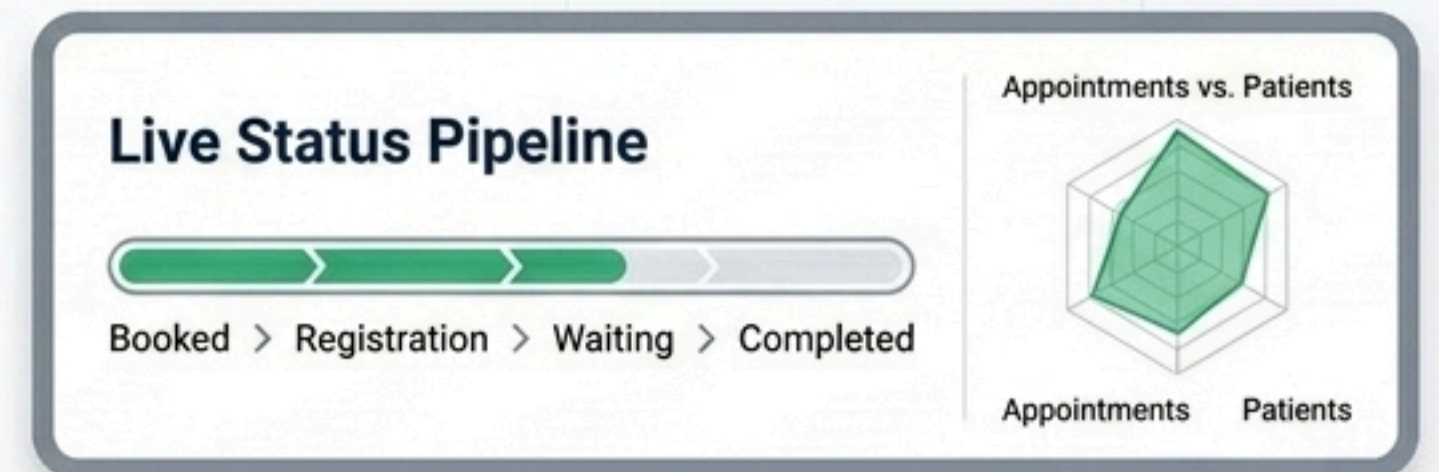

## Ecosystem Integration (The Government)

- Seamlessly feeds accurate, real-time health intelligence into the national grid.
- Operates invisibly in the background.
- Adds zero friction to the clinic's daily operations.

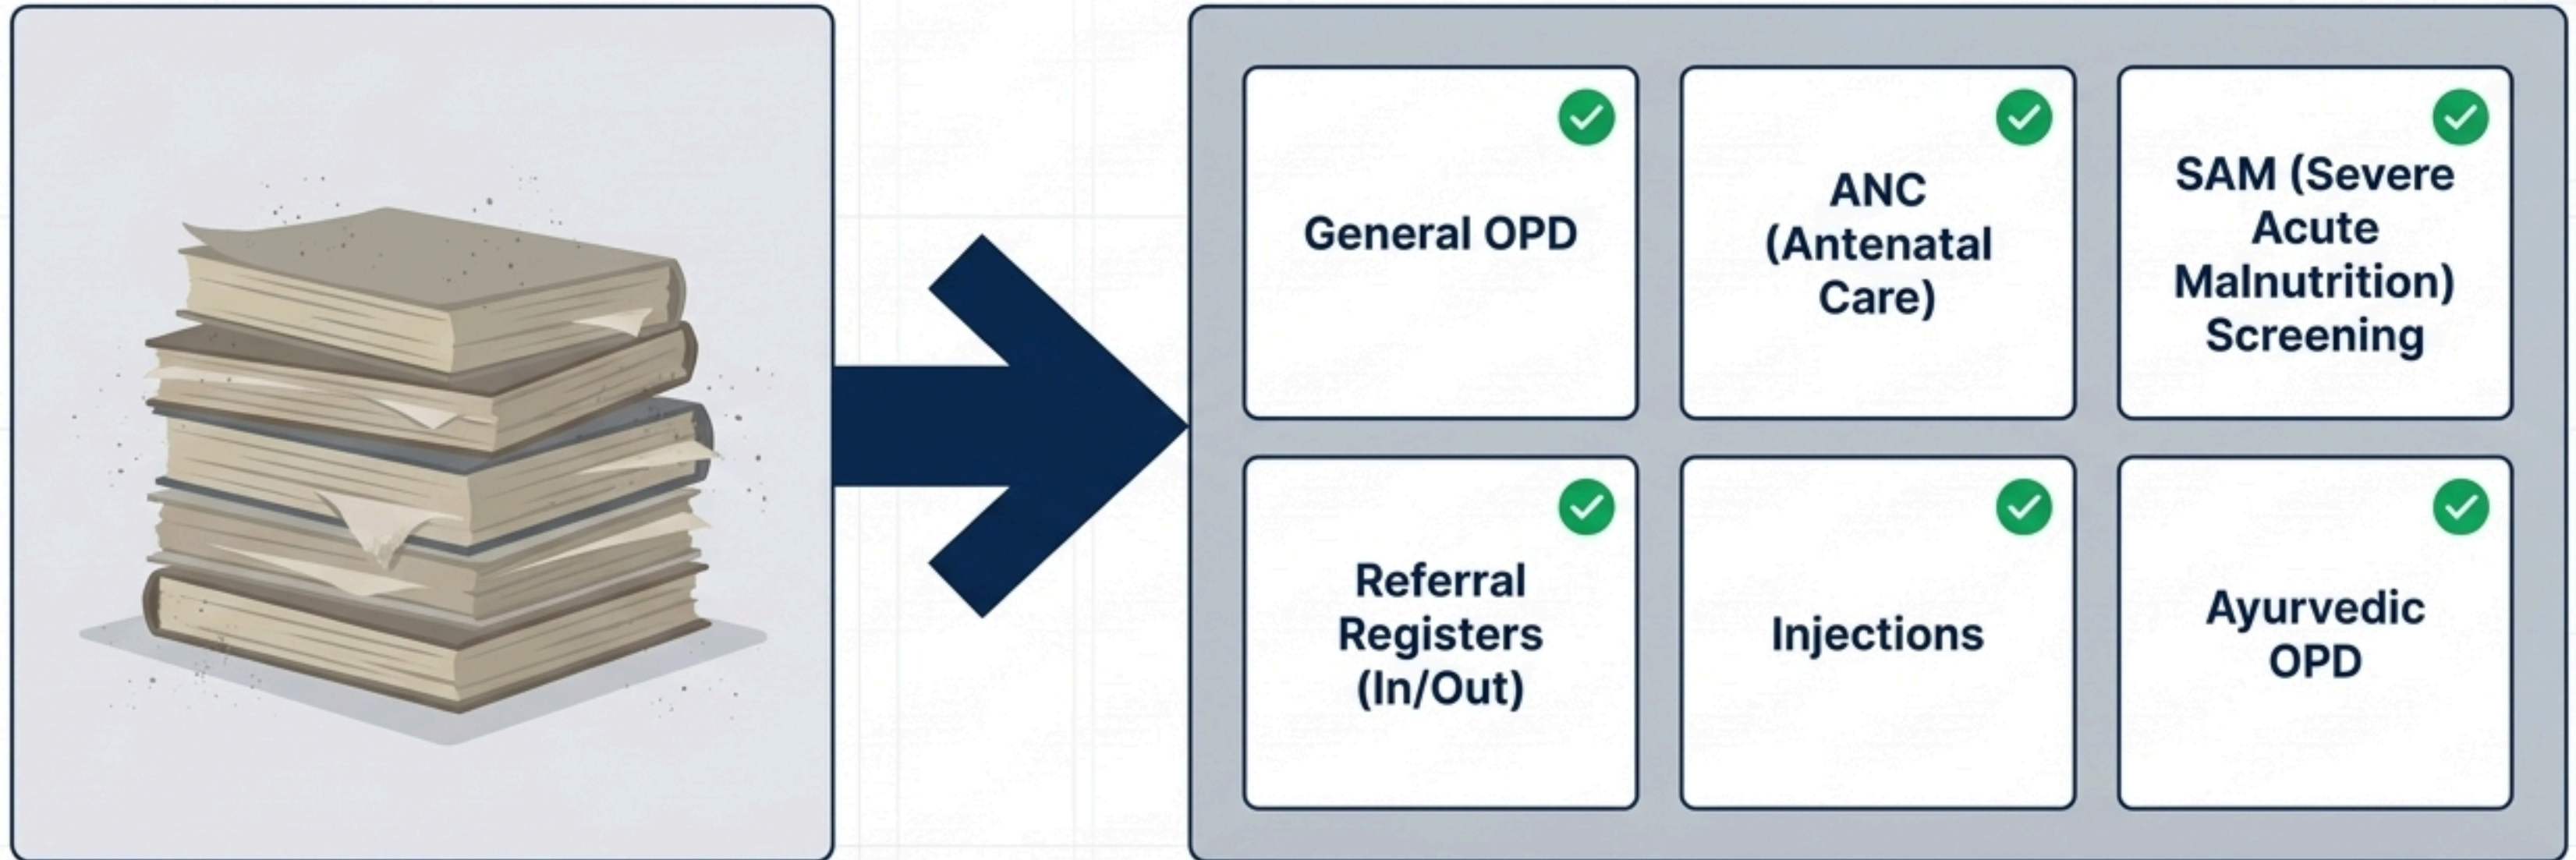

# Frictionless Compliance with the National Health Grid

# Actively Managing the Entire Patient Journey.

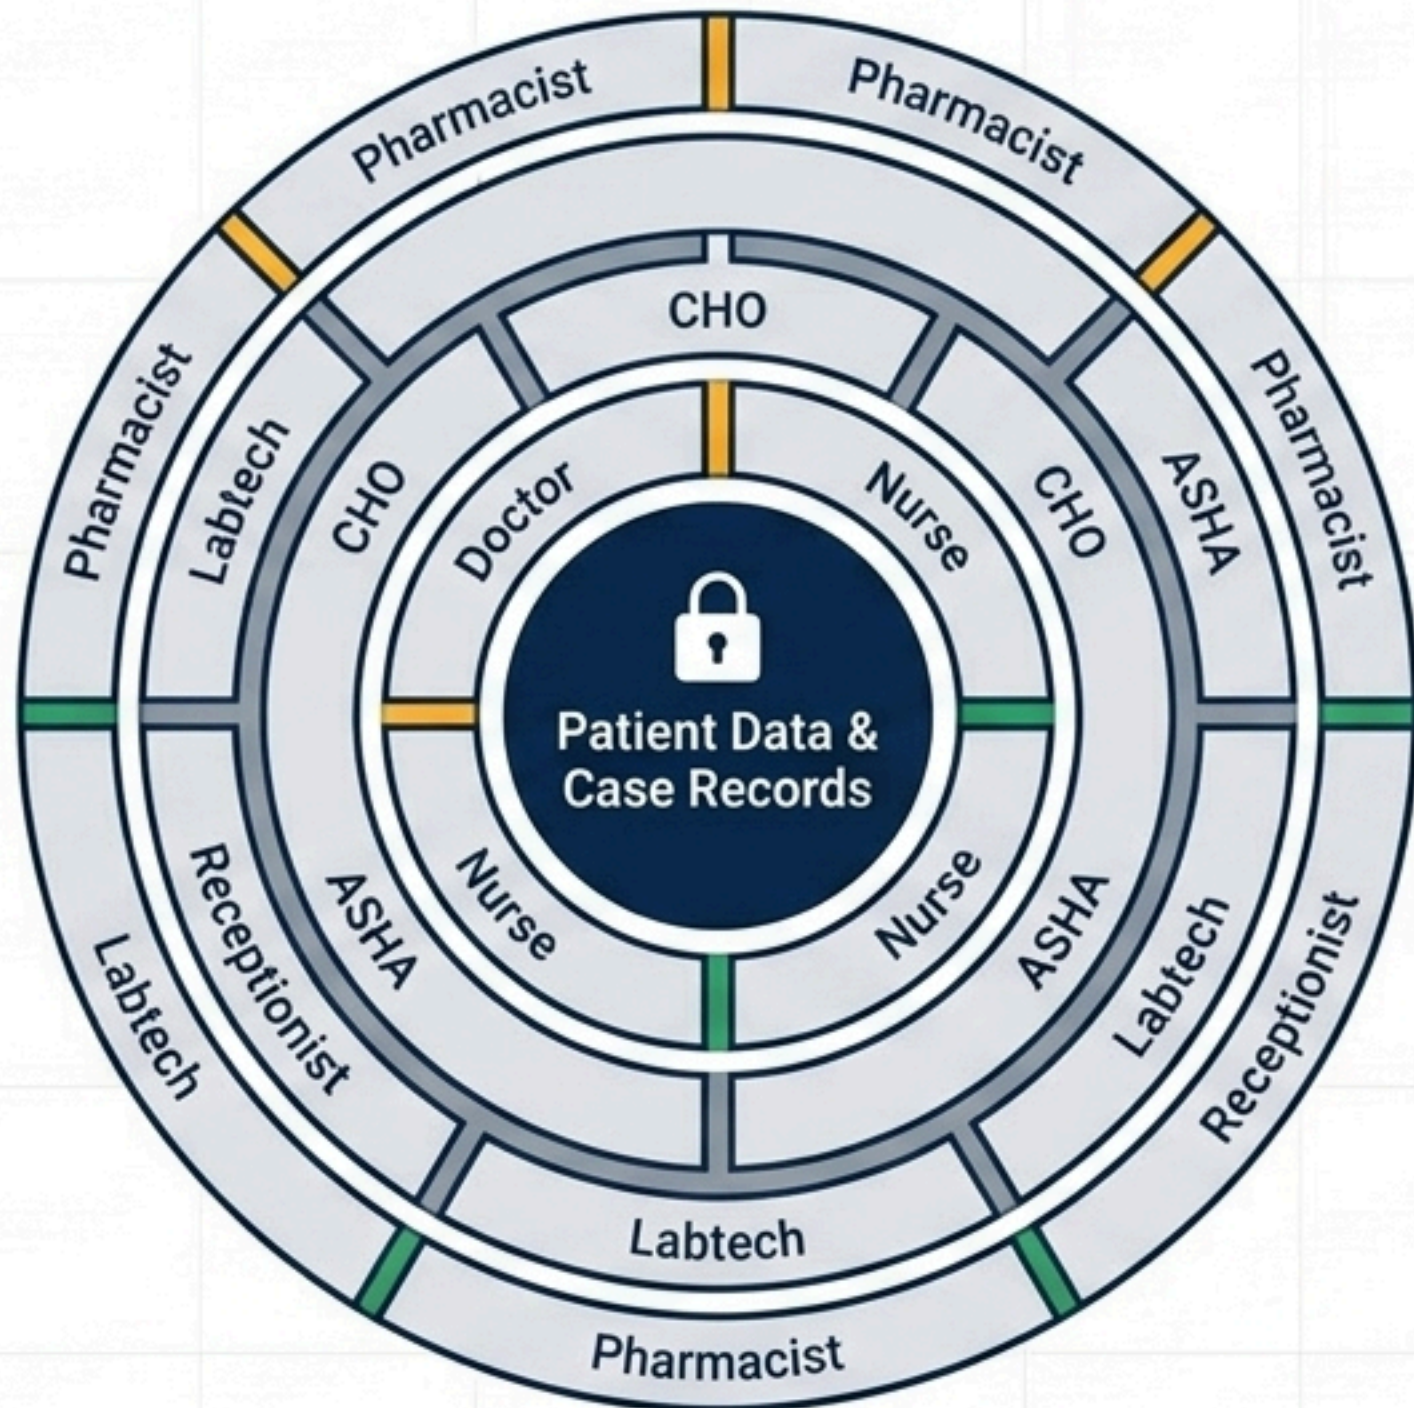

# Making Physical Logbooks Obsolete

Delivers instantaneous government reporting and auditing with zero extra administrative overhead for the clinical staff

# Uncompromising Data Integrity and Access Control.

**Strict RBAC (Role-Based Access Control)**  
Pre-configured, highly specific access profiles customized for the exact hierarchy of a Primary Health Center.

**Granular Module Permissions**  
Administrators dictate strict Read, Write, and Delete protocols across all sensitive modules to prevent unauthorized data manipulation.

**Total Oversight**  
Ensures absolute data integrity and auditability while keeping the system agile and frictionless for daily frontline users.
